## PROJECTS

*Ember Hangman* - A hangman application built using Ember, Nodejs, and MongoDB

*Currency Converter* - Convert currency values from one to another with this single page react.js app

*Landing Page* - Webpage for my "important" information homepage for tracking price of Ethereum and viewing upcoming local music events

*Type Test* - React app that tests your typing speed

*Midnight (dice game)* - (in progress) 1-4-24 dice game application built with python and flask

*Peer Pulse* - (My first web app) A social voting app for sharing ideas. This app was created using React.js, Bootstrap, and Firebase.

## EXPERIENCE

### WEB DEVELOPER

*Impact DataSource* | Mar 2017 - Present  
Austin, TX

- Work directly from the company's backlog to resolve bugs and build new features using javascript and emberjs; push changes using git
- Create compatibility with external resources and overcome common proxy issues such as cross-origin resource sharing, and API authorization
- Actively participate in weekly UX design discussions and feature planning meetings
- Prominent features I've worked on include a subscription management portal and an uploads (file storage) section using AWS's S3 service.

### ACCOUNT MANAGER

*AT&T Corporate Business Solutions* | Sep 2014 - Mar 2016  
Sacramento, CA

- Learned and leveraged a vast portfolio of wired and mobile services to acquire new business customers in the greater Sacramento area
- Trained and supported over 70 retail representatives from AT&T corporate stores and authorized retailers to drive revenue
- Promoted to Step 2 Sales Executive for achieving an overall weighted attainment of 177% above 2015 quotas
